## Who and What:

Across the middle school years, the social skills required for successful peer relationships become more complex. Children in 5<sup>th</sup> through 8<sup>th</sup> grades will learn about middle school friendships and the social skills they need to make and keep friends. This group experience led by child psychologist Dr. Kelly Flanagan is appropriate for children who are struggling with changes in their friendships in middle school, children who are shy, children who have trouble understanding social relationships, and children who lack awareness of appropriate behaviors with peers.
